

1. Search for “iland diagnostics” from the Google Play store or Apple App store and download the app.
2. Open the app and create a new account by selecting Sign Up.
3. Register the Bluetooth adapter using the serial number and activation code provided.
4. After registration, you will be asked to activate a model family.
5. Once activated, download the required model family software (Please Note, a good internet connection is required to do this).
6. Once downloaded, connect the Bluetooth adapter to your vehicle and switch the vehicle ignition ON (the adapter will illuminate to show it is powered).
7. Follow the user guide and on-screen instructions to pair your mobile device with the adapter over Bluetooth.
8. For further information on how to setup, configure and use your new iLAND tool please visit <http://abrit.me/iland> to download the user guide or scan adjacent code.
